Permission to enrol in MEngSci thesis course

Step 1: Find a project and supervisor

As part of your Master of Engineering Science at UQ, you have the opportunity to undertake a research project. You must find a project and supervisor prior to enrolling in your thesis course, complete Permission Form (following page) and submit to the School of Mechanical and Mining Engineering (Frank White Building [43], Level 2 reception area) or email to enquiries@mechmining.uq.edu.au.

How to find a project and supervisor:

1) You can view available projects on the EAIT Project Database: https://student.eait.uq.edu.au/projectdb/

View the Published Offerings for your commencing semester.
The projects are listed under “MEngSc (Undeclared)”

2) Review the available projects and contact the Academic staff member via email regarding your interest in the project. Important: Please ensure you include your name, student number and identify yourself as a Master of Engineering Science student in your email communications.

3) If you cannot find a project on the EAIT Project Database that you are interested in, you can search for a different Academic staff member in your area of interest using the UQResearchers website. UQResearchers provides a summary of current UQ staff and their contact details. If you find a staff member doing research that you are interested in, contact them directly via email for an available topic.

4) Once you have found a project and supervisor, meet with your supervisor and complete the back of this form together. Alternatively, this process can be completed via email with your supervisor.

The UQResearchers site is a useful database with details of current staff and their research areas: http://researchers.uq.edu.au/. In the search function, use the “Browse By > Fields of Research” to narrow your search. Enter “Mechanical Engineering” or “Materials Engineering” to find a staff member in your area.

School of Mechanical and Mining Engineering
